Getting a job is a very hard period in the life of most people. Companies choose an employee from hundreds of candidates according to special rules, that is why there are special "typical" factors, influencing on employer's choice. Among such factors are: age, sex, experience, family background and marital status, personality and references.

If you are to go to an interview tomorrow, sleep well before it and do not forget your CV at home - is the basic rule. Moreover, there are some recommendations, which can help you. For example, read annual report, or a newspaper of the company to show your understanding of the corporate strategy on the interview. What is more, you should choose corresponding dress code for the interview. Even such advices are to help you make a good impression; some companies do not want to hire a man, who follows every advice. To illustrate this, I can quote Artemiy Lebedev, the most famous Russian web-designer: "If you enclose a

standard stupid resume, written by the rules of American bureaucracy, we would delete it immediately after receiving. If your CV is composed according to all rules, we would not choose you, as we might think, that your profession is to acquire a job".

People in contemporary world can hardly imagine their lives without machines. Every day either a new gadget is invented or an old one is improved. Different people appreciate new inventions differently. Some suppose that sophisticated gadgets are really useful and necessary, while others find them absolutely awful as they influence people badly. As for me, I am pretty sure that gadgets make people's lives easier.

Firstly, they do all kinds of dirty and hard work, as cleaning. Secondly, devices can save a lot of time as well as storage space. For instance, a computer disk can contain the same amount of information as several thick books. So, machines help people in different spheres.

However, opponents of this point of view are definitely sure that gadgets affect people negatively. People are reluctant to work due to the influence of machines. People become lazy and disorganized. They just expect their latest gadgets to do everything instead of them. Moreover, according to scientists, a great number of widespread devices produce radiation that can cause serious health problems.

The Internet is not only the assistant in daily work, it is also the other world in which there are mail boxes, libraries, photo galleries, games, shops. By means of the Internet people can travel to different cities, visit tourist places, communicate with people.

Recently many people ask a question: " Is the Internet harmful or useful? ". I think, that on this question there is no certain answer. In fact on the one hand the Internet is a very good and useful thing. And on the other hand it has many negative functions: dependence, the waste of time, money, health.

Certainly, the Internet can be the excellent assistant in information search. But if we spend a lot of time on the Internet we`ll have some problems. Speed, excitement, danger. You can find all these in the different extreme sports that have become popular in last 10 years. Take bungee jumping. You jump off a bridge and you fall and fall, and then, just before you hit the ground or water, an elastic rope pulls you back. In skysurfing you jump out of aeroplane and use a board to "surf" the air, doing gymnastics in mid-air! Winter sports have always an element of danger. For example snowboarding, which has all the excitement of surfing but on snow, is more dangerous even than skiing.

Probably the most dangerous of all the new winter sports is snowrafting. You sit in a rubber boat and sail down a mountain at great speed – and you can't control the boat!

Of course, water sports have always been fun. Ice diving, for those people who are absolutely crazy. You put on diving equipment and dive under a frozen lake. And, if that's not enough, you try to walk upside down on the ice! I feel cold just thinking about it.

What is friendship? Some people will say that it is a feeling of mutual liking between two or more people, other will add that it is a state when one person understands and supports the other one.

To my mind friendship can be compared to a tree. Its seed should find good soil and under good conditions it will grow into a tree. As the years go by the tree stands firmer and firmer on the ground. And if it is strong enough, it will survive all the storms and winds. But to help it, we should take care of it and love it.

The most important feeling that exists between friends is trust. It never appears by itself, it's the result of a long friendship and this feeling is very valuable. Respect and tolerance are also very important; it means that you don't criticize your friend's way of living, but try to understand him, discuss problems with him and explain to him what you think is good and what is bad. A friend is a person who can help you in time, lend you any sum of money for a long period of time without any percent, whom you can wake up in the middle of the night just to say you feel worried or who is eager to do everything for you waiting nothing in return, who supports you in all your beginnings and who will never betray you.

The game probably arose from boys playing on the ice. The kids probably fashioned pucks from frozen "horse apples" and adapted tree branches as hockey

sticks, and played on cleared stretches of frozen lakes and rivers, and backyard rinks. Soon it was inevitable that teams began to play against each other and leagues were formed.
